

# Operating Committee and Planning Committee

of the North American Electric Reliability Corporation

October 12, 2009

Mr. Warren Frost  
CANADA

Dear Warren,

## Integration of Variable Generation Task Force

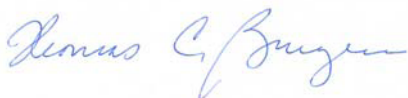

On behalf of the NERC Planning and Operating Committees, we want to extend our sincere appreciation to you for your valuable leadership and accomplishments as chair of the Operating and Planning Committee's joint Integration of Variable Generation Task Force (IVGTF). The electric industry in North America is on the brink of one of the most transformative and dynamic periods in its history. You are to be congratulated on leading a group that addressed one of these significant trends: accommodating large amounts of variable generation.

The ongoing industry efforts and plan of action for NERC document in the final report, "*Accommodating Large Amounts of Variable Generation*," was a vital step forward for NERC and its stakeholders. The ongoing plan lays the foundation for fundamental contributions in the way the system is planned, operated and used. Your contributions as Chair resulted in a vital industry understanding and a clear path forward to support bulk power system reliability.

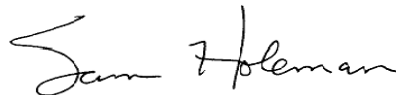

Finally, we want to recognize your service as member of the Operating Committee. Your past participation and contributions in support of NERC's mission to ensure bulk power system reliability are very much appreciated.

Thank you, Warren, for a job very well done.

Sincerely,

Thomas C. Burgess Chair  
NERC Planning Committee

Sam Holeman, Chair  
NERC Operating Committee
